

# Instructions: Urbanline Deck Sealer

Urbanline Composite Deck Sealer provides a transparent, proactive barrier against oil and water. It protects your composite deck without compromising the surface integrity and assists with removal of oil and water based stains

## 1. Surface Preparation

The surface should be clean, dry free of any waxes, coatings or finishes or contaminants.

## 2. Application Method

Test a small inconspicuous area first to determine suitability of purpose. Apply the Composite Deck Sealer liberally in even coats using a new microfiber mop, or lambs wool applicator. Take care to avoid excessive foam generation and if this occurs lay off the surface quickly with a soft broom to break the foam. Allow 30-60 minutes drying time between coats. The surface is sealed when the sealer no longer soaks into the surface. Wipe off any Composite Deck Sealer solution that has not been absorbed within 10 minutes.

## 3. For Porous Surfaces

The first coat will completely absorb into the surface. Allow the surface to dry 30-60 minutes and apply a second coat. If the second coat is not absorbed within 10 minutes, wipe off the excess. Some very porous surfaces may require a third coat.

## 4. Maintenance

Wash down the treated surface every few months to keep it clean. When surface needs a refurbishment, powerwash thoroughly and recoat as indicated.

## 5. Storage

Dispose of contents/container in accordance with local regulations.

### **WARNING**

#### **HAZARD STATEMENTS**

Harmful if inhaled.

May cause an allergic skin reaction.

#### **SAFETY (PREVENTION STATEMENTS)**

Use only outdoors or in a well-ventilated area.

Wear protective gloves/protective clothing/eye protection/face protection.

Avoid breathing mist/vapours/spray.
